LIGHT LIST REFERENCE: ATLANTIC COAST, VOLUME 1, COMDTPUB P16502.1, 1996 Edition

The Distrigas Facility in Everett, MA expects to continue receiving shipments of Liquefied Natural Gas from the National Algerian Petroleum Corporation. The shipments will be delivered every two to three weeks, October through March and every six to eight weeks, April through

September by Algerian and U.S. Flag LNG tankships. The Captain of the Port will activate a moving safety zone around each vessel as it transits Boston Harbor. In accordance with the regulations in 33 CFR 165.110, all vessels must remain clear of the main ship channel two miles ahead and one mile astern of the LNG tankers during the transit. During cargo off loading the safety zone will remain in effect around each vessel moored to the Distrigas facility. In accordance with the regulations in 33 CFR 165.110, all vessels must remain clear of the moored LNG tanker at a distance of at least 50 yards. Marine Safety Broadcasts will be made every 30 minutes advising the vessel's location while each LNG tanker transits the Port of Boston. Notification of the broadcasts will be made on VHF-FM Channel 16, and the actual broadcasts will be made on VHF-FM Channel 22. The Captain of the Port will keep the port community informed of LNG tanker arrival times and associated harbor closures. Questions should be made to the Port Safety and Security Division of the Marine Safety Office at (617) 223-3000.

MASSACHUSETTS WATER RESOURCES AUTHORITY EFFLUENT TUNNEL CONSTRUCTION

The Massachusetts Water Resources Authority is currently constructing an effluent outfall tunnel which will connect the Deer Island Waste Water Treatment Plant to a series of diffuser pipes which extend approx. 10.5 feet above the sea floor. Construction is scheduled to be completed in January 1998 when the tunnel will finally be flooded. During this time workers will be in the tunnel, and any damage to the tunnel or diffuser pipes could result in fatalities. Therefore, mariners are strongly urged not to anchor, dredge, or drag in a zone 1,000 ft to either side and each end of the diffuser area between the points 42°23'19"N 70°46'48"W and 42°23'04"N 70°48'14"W. For additional information contact Joseph Griffith at (617) 539-7720

NATIONAL PARK SERVICE - REGULATORY MARKERS - SANDY HOOK, NJ

The United States Department of Interior, National Park Service, has installed regulatory marker buoys in the bay and ocean waters around Sandy Hook, NJ. In position 40 25' to 40 28' latitude and 73 58' to 74 01' longitude. The buoys indicate No Wake Zones and areas closed to boat traffic. Spmaceti Cove, on the bayside at 40 25' 30" and 73 59' 00" is closed to all boat traffic due to wildlife management activities. Boaters are requested to remain outside of the buoys along the oceanside beaches due to high numbers of swimmers using the area. These buoys will remain in place until 10/31/97, at which time they will be removed for the winter season. For more information contact (908) 872-5933.
